Key Insights and Recommendation

Insights

1. Employees working overtime exhibit significantly higher attrition.

2. Attrition is concentrated within **early-career** employees.

3. **Lower income** bands show elevated turnover risk.

4. **Sales** roles experience the **highest** employee churn.

Recommendations

1. Improve **work-life** balance initiatives.

2. Improve **retention incentives** for employees within first 3 years.

3. Review **compensation** strategy for lower salary bands.

4. Reduce **overtime** dependency in Sales teams.

Calculation	The "How"	The Why
Risk Score	A weighted scale (0-6) based on Overtime (2pts), Job Satisfaction (2pts), Income (1pt), and Tenure (1pt).	Higher scores identify employees with multiple "burnout" or "exit" indicators.
Risk Segment	Groups scores into High (≥ 4), Medium (≥ 2), and Low (< 2) risk categories.	Provides HR with a prioritized list for retention strategies and "stay interviews".
